

# Marcilane Antunes

Front-end Developer

## WORK EXPERIENCE

### Junior Web and Mobile Developer Fantalab - Oct 2023 to present

- Revamped the majority of the site's layout, substantially improving both navigation and visual design.
- Developed several key features including a news management system, a personalized news feed, a real-time audio sharing soundboard for auctions, and high-performance data tables to enhance user interaction and UI responsiveness.
- Resolved numerous bugs, improving stability for over one million users.
- Currently working on a fantasy football game to further engage users.

GIT - SOURCETREE - GITHUB - VSCODE -  
WEBSTORM

## ABOUT ME

With nearly one year of professional experience and a rigorous programming training, I have honed my skills in developing dynamic web and mobile applications using the React framework.

My experience at a small company has provided me with the unique opportunity to take on diverse responsibilities, rapidly expanding my skill set and allowing me to make significant contributions across multiple aspects of the development process.
