Marcilane Antunes
Front-end Developer

WORK EXPERIENCE

Junior Web and Mobile Developer
Fantalab - Oct 2023 to present

- Revamped the majority of the site's layout, substantially improving both navigation and visual design.
- Developed a news management system for collaborators to create and publish articles.
- Created a personalized news feed in the app that delivers the latest updates on users' favorite players, keeping fans informed and engaged.
- Created a soundboard feature for real-time audio sharing, enhancing user interaction during auctions.
- Integrated high-performance data tables using React Virtualized to improve UI responsiveness.
- Resolved numerous bugs, improving stability for over 500,000 users.

GIT - SOURCETREE - GITHUB - VSCODE -

WEBSTORM

ABOUT ME

With nearly one year of professional experience and an additional eighteen months of rigorous programming training, I have honed my skills in developing dynamic web and mobile applications using the React framework.

I specialize in writing clean, efficient code and I am dedicated to optimizing the functionality, efficiency, and performance of web and mobile applications.
